

Installation of the

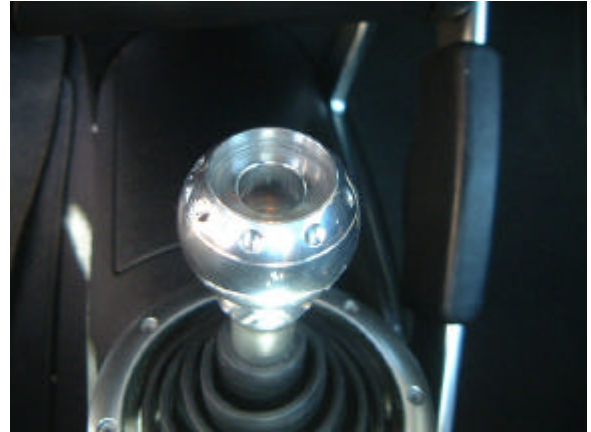

ForgeMotorsport

Gear knob

Step 1
Unscrew the existing gear knob

Step 4
Screw the new knob firmly into place

Step 2
If the plastic spacer ring has not remained attached to the gear knob, remove it from the shaft as per Step 3, You may need to prise it out with a screwdriver

Step 5
Insert the top into the knob, suitably aligning the position. Once fitted, if the positioning is incorrect, the knob will have to be removed and the insert pushed out with a pen or similar implement from the inside.

Step 3

Finished
