

Probes

The Terratrip 2 requires one of the following probes:

WHEEL PROBE

T005

This probe is fitted to 'look' at the bolts holding the brake disc to the hub on a non driven wheel

UNIVERSAL CABLE DRIVE PROBE

T006

This probe fits all cars with a mechanical speedometer cable

JAPANESE PROBE

T007

This probe is fitted between the gearbox and speedometer cable on many Japanese cars

DSI

T014

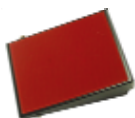

Dual Sensor Interface - For cars with electronic speed sensors, will also drive two tripmeters from one probe

Optional + Accessories

REMOTE ZEROING UNITS

T010

T008

Choose hand operated T010 or the T008 Foot operated unit

Terratrip 2 Rally Computer

T2

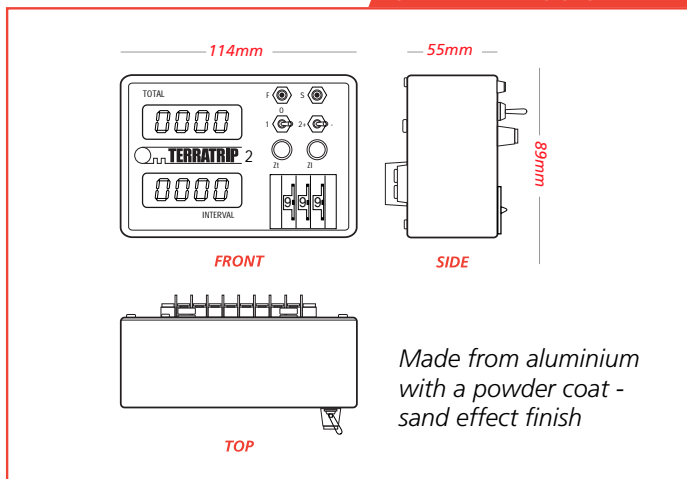

Due to popular demand we have recreated the 1980s Terratrip 2, to it's original specification. This rally computer will appeal especially to Classic car rallyists who wish to create the authentic look for their cars.

The Terratrip 2 was used in the 1980's by top teams such as Citroen, Ford, Peugeot, Toyota, Vauxhall and drivers such as Jimmy McRae, Ari Vatenen, Jean Todt to win world and national championships.

FEATURES

- Two distance displays up to 99.99
